

CODEALPHA TASK 2 – STOCK PORTFOLIO TRACKER

OBJECTIVE

The objective of this project is to develop a simple Stock Portfolio Tracker using Python. The system helps users calculate total investment value based on stock prices and user-entered quantities, improving understanding of Python fundamentals.

PROJECT DESCRIPTION

The Stock Portfolio Tracker includes:

Predefined stock price dictionary 

User input for stock name and quantity 

Investment calculation for each stock 

Total portfolio value calculation 

Option to track multiple stocks

TOOLS USED

Python 

VS Code 

FEATURES

1. Stock Price Dictionary

Stock prices are stored in a predefined dictionary.

2. User Input System

Users can enter stock names and quantities dynamically.

3. Investment Calculation

Each stock investment is calculated using:

 Price × Quantity

4. Total Portfolio Value

Displays final total investment value.

CONCEPTS USED

- ✓ Dictionary (Key-Value Pairs)
- ✓ While Loop
- ✓ Conditional Statements (if-else)
- ✓ User Input Handling
- ✓ Arithmetic Operations

KEY LEARNINGS

- ✓ Understanding Python dictionaries
- ✓ Working with loops and conditions
- ✓ Handling user input effectively
- ✓ Building real-world mini applications
- ✓ Improving logical thinking skills

INSIGHTS

Python can be used for financial tracking systems

Dictionaries are powerful for storing structured data

Loops help handle multiple user inputs

Simple logic can create real-world applications

🏁 CONCLUSION

The Stock Portfolio Tracker successfully demonstrates how Python can be used to build a simple financial tracking application. This project strengthens understanding of core programming concepts and real-world problem-solving skills.

📷 OUTPUT

```
Stock Portfolio Tracker
Enter stock name (or type 'done'): AAPL
Enter quantity: 2
Investment for AAPL: $360
Enter stock name (or type 'done'): TSLA
Enter quantity: 1
Investment for TSLA: $250
Enter stock name (or type 'done'): done

👛 Total Investment Value: 610
```

- ✓ Stock Input
- ✓ Quantity Input
- ✓ Individual Investment Calculation
- ✓ Total Portfolio Value Display
